Fishbowl Solutions linkAccess™ Trigger

Automate deliverable creation based on lifecycle milestones in Windchill® PDMLink™

Business Need

According to industry statistics, for every one person creating data there are ten others in the organization that need access to it. However, with the complexity of today's engineering environment and tools, having access to this data has never been more challenging. Currently, individuals outside the engineering department must make a special request to obtain data, diverting expensive engineering resources from critical projects. In addition to the time and resource costs, this process creates an unnecessary information bottleneck. Wouldn't it be nice if engineering could focus on critical engineering tasks and not deliverable creation for other departments?

Solution

linkAccess Trigger for PDMLink or Pro/INTRALINK® is an application developed to address these enterprise data access problems. Customers can now realize rapid Return on Investment by automating manual tasks and empowering end users with easy access to information and deliverables within Windchill.

Fishbowl Solutions has leveraged their elite Gold Level Status within the PTC PartnerAdvantage™ Program to develop the most robust backend technology, able to handle large assembly data sets, assemblies that include challenging Family Tables and Pro/PROCESSTM drawings better than any product in its class.

Benefits and Features of linkAccess™ Trigger

- linkAccess Trigger automatically generates deliverables upon designated events in Windchill.
- Pro/ENGINEER® Drawings and/or Models and AutoCAD® drawings converted to any supported output type and named according to organizational standards such as drawingname_rev.pdf
- Basic watermarking capability
- Configurable to move files to a network file location or have linkAccess check them back into Windchill as primary or secondary content.

Contact Information

Supported PDMLink Events

- Promote
- Check In
- Revise

Supported Platforms

- Windows is supported for the CAD Worker
- VMWare is supported for the CAD Worker
- Available license of the CAD application for the CAD Worker
- Sufficient RAM to open desired CADfiles on the CAD Worker
- IBM AIX, Sun Solaris and Windows Windchill App servers are supported
- A service and class files will need to be installed on the app server
- PTC supported versions of Windchill PDMLink or Pro/INTRALINK and the CAD applications

Supported Output File Types

- Pro|ENGINEER Drawings: PDF, HPGL, Native
- Pro|ENGINEER Parts: STEP, IGES, ProductView, Native, 3D PDF
- Pro|ENGINEER Assemblies: STEP, IGES, ProductView, Native, 3D PDF
- AutoCAD: PDF, DXF, Native
- Other non PTC Files: Native
