

Fishbowl Solutions Add-On Software for PTC Products

Who We Are

Fishbowl Solutions provides add-on software, consulting services, and customizations for PTC's Windchill® and Creo® products. Fishbowl's automation and integration software promotes better return on investment from your PTC products by solving costly and frustrating knowledge sharing problems. In addition to our packaged software, Fishbowl develops custom applications built specifically to the needs of the customer. Fishbowl is a Gold-Level member of the PTC Partner Advantage™ program.

linkLoader™

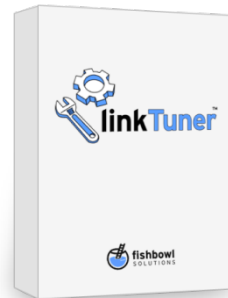

Fast & Easy Bulk Loading for Windchill

- Load from file systems, TeamCenter, PDMWorks, and other Windchill instances
- Support for Creo (Pro/E), SolidWorks, AutoCAD, Inventor, or Documents
- Validate prior to loading, and automatically find duplicate files
- Map revision, life cycle state, attribute metadata

linkTuner™

Benchmark and Tune Windchill Performance

- Ensure that your servers will handle Creo or Pro/E user demand
- Reproduce actual user activity to support system tuning
- Benchmarking capabilities for comparative analysis
- Gather empirical performance data so you can manage your systems

linkAccess™

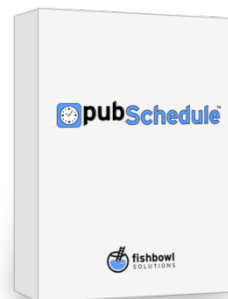

Automatically Generate Windchill Deliverables

- Automate the creation of viewables such as PDF, IGES, STEP and more
- Provide easy access to viewables for downstream users
- Available in Trigger, On-Demand, or Batch mode

pubSchedule™

Custom Publishing for Windchill Made Simple

- Automate the creation of viewables such as PDF, IGES, STEP and more
- Provide easy access to viewables for downstream users
- Available in Trigger, On-Demand, or Batch mode

linkTrigger™

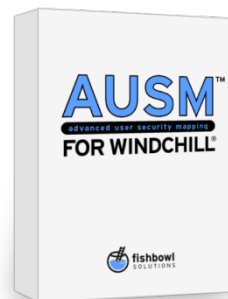

Enforce Company Standards in Windchill

- Block the check-in of objects that do not meet company standards
- Initiate linkTrigger on check-in, check-out, promote or set state

AUSM for Windchill™

Advanced User Security Mapping

- Automatically Assign Users to Groups within Windchill
- Avoid directly assigning each user's roles
- Map group memberships to values within a Single-Sign-On system

CADVerify™

Automatic Data Validation in Creo (Pro/E)

- Automate your check and release process
- Reduce data quality issues
- Go beyond ModelCHECK™ to validate your entire database
- Reclaim 5-20% of your time, currently spent dealing with bad CAD data

DXF Flat Pattern Automation™

Quickly Create Sheet Metal DXF Flat Patterns

- Fully automate your DXF flat pattern creation across an entire assembly
- Drastically reduce errors caused by manual work
- Save time and remove the burden of flat pattern creation from CAD users

Inspection Report Automation™

Create Quality Inspection Reports Based on Creo or Pro/ENGINEER® Drawings

- Automatically create inspection reports based on Creo Elements/Pro or Pro/E drawings
- Eliminate hours of non-value added time
- Avoid errors caused by manually entering dimensions, geometric tolerances and notes

Data Clean Up Tools™

Update and Merge Pro/ENGINEER metadata when migrating to Windchill

- Automatically update attributes, parameters and life cycles and more before migrating to Windchill
- Ensure standardized, accurate metadata
- Use after migration to maintain clean and accurate metadata

Baseline Promote™ for Windchill 9.X

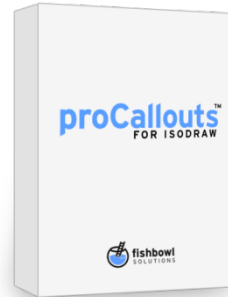

Simplify the Promotion of Objects in Windchill

- Collect disparate objects for a common promotion
- Combine objects into a single promotion form
- Automatically populate the "New Promotion Form" with all the items belonging to a given baseline

Pro Callouts for IsoDraw™

Link Creo or Windchill BOMs to Callouts

- Automate IsoDraw callouts based on Creo (Pro/E) assembly structures
- Easily transfer Creo or Windchill BOM data into IsoDraw Callouts
- Eliminate manual callout creation

Custom Application Development Services

We Automate. You Innovate.

Are you looking for ways to save time? Do your users perform repetitive tasks? Do you manually enter information into another application or system? Do you use ModelCHECK™? Fishbowl Solutions can create custom applications to meet your needs. Examples of past solutions include:

- Automating manual tasks.
- Creating integrations with external applications.
- Creating custom checks in ModelCHECK™.
- Ensuring your Creo Elements/Pro (Pro/ENGINEER) data meets company standards and best practices.
