

Redlining and Collaboration Solution™ for Oracle® Content Server™

In the face of increasing international competition, manufacturers around the globe are always striving to reduce costs and to bring products to the marketplace in increasingly shorter periods.

business problem

Throughout the design, development and manufacturing process, whether across geographical boundaries, within the company, or between increasing numbers of supply-chain partners, collaboration is crucial. Streamlined, user-friendly collaboration processes improve information sharing, reduce process times, and cut expenses. From Material Safety Data Sheets (MSDS) and ISO procedures to product specifications, design drawings and Engineering Change Orders (ECOs), most documents are subject to a collaborative editing process prior to final approval. Companies are increasingly more likely to use electronic collaboration and markup or “redlining” tools to facilitate meetings between remote team members or external partners. As a result, documentation that must be closely tracked and audited buries manufacturers.

business solution

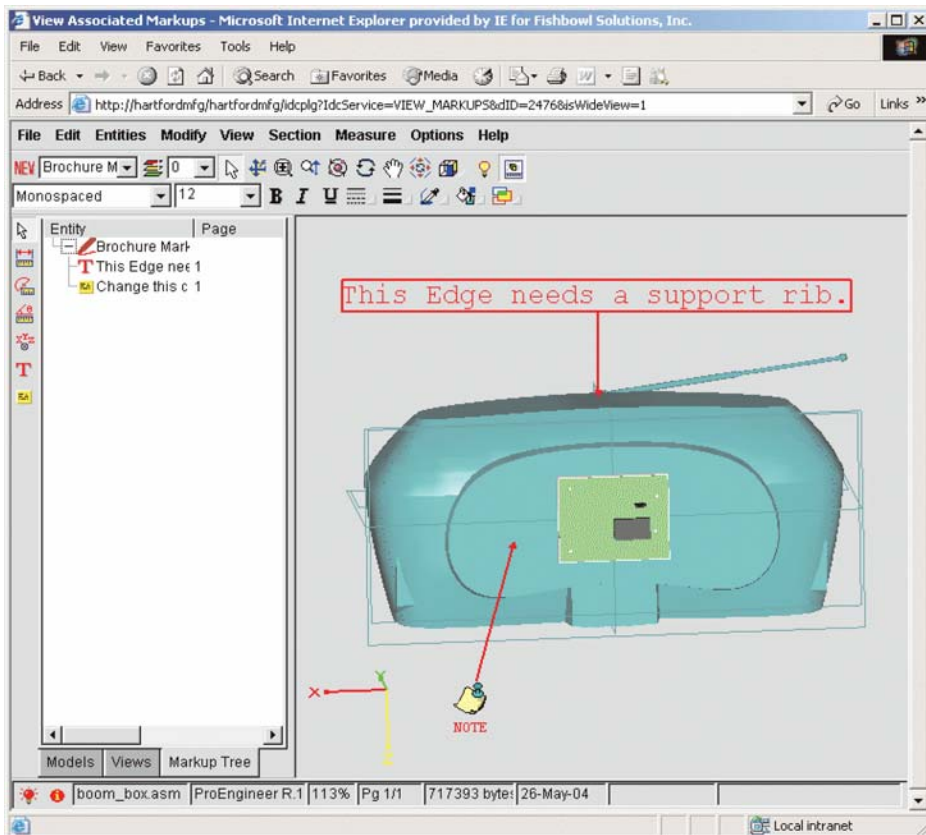

By harnessing its expertise in the manufacturing and engineering industries and its experience with Oracle Content Management implementation and customization **Fishbowl Solutions®** is able to offer manufacturers the **Redlining and Collaboration Solution**—providing manufacturers with a unique, interactive markup solution that is tightly integrated with an industry-leading content management system.

Redlining and Collaboration Solution:

- Provides the ability to easily and quickly markup drawings and documents
- Supports the routing of redlined documents for review, comments and approval
- Allows enterprise users to access engineering documents from a central repository
- Enables interactive, real-time collaboration sessions with internal or external/third-party team members
- Lets users quickly view any redlined versions of the document, toggle between the original and redlined version, and view the differences between the two.
- Identifies edits by author, date/time, and type

features of Fishbowl Solutions Redlining and Collaboration Solution

- Provides enterprise access and B2B viewing collaboration and markup solutions to engineering - focuses drawings and documents
- Full redlining and markup capabilities and visual "diffs" of engineering drawing files by streamlining review and approval cycles
- Is cost-effective and easy to use—allowing markup via any web browser, without the native application
- Fast implementation, requires no client installation, and little-to-no administration
- Oracle content users need not leave the Content Server environment to access and markup documents
- Using the Oracle Content Management security model ensures redlined files are only seen by the appropriate people
- When used with Oracle Collaboration Server, provides an intuitive and secure method for collaborating with external partners, customers, and other third parties

The Solution

Annotate drawings with text, sticky notes and other tools. View drawings and markups via a Web browser, without the native application.

About Fishbowl Solutions

Fishbowl Solutions, founded in 1999, is a national leader in partnering with its clients to deliver innovative and effective services and solutions that provide competitive advantages in the mechanical engineering market. Fishbowl Solutions is differentiated by its unparalleled industry and technology expertise; its solid reputation for on-time delivery, value-added results and enhanced ROI; and its clear-thinking, accountable and knowledgeable people.

Fishbowl Solutions, an Oracle Content Management Partner since 1999, offers several products to complement the Oracle Content Management product line, including Advanced User Security Mapping, Subscription Notifier, Redlining, CADConverter and others. The certified Services Team delivers a wide variety of services to enhance Oracle Content Management.
