

Enterprise BatchLoader™

Consolidate & Batch Load Information into WebCenter Content

Do you need an **easier way to link** information across multiple **business systems**?

Do you struggle with **slow processes to batch load content**?

With Enterprise Batchloader You Can:

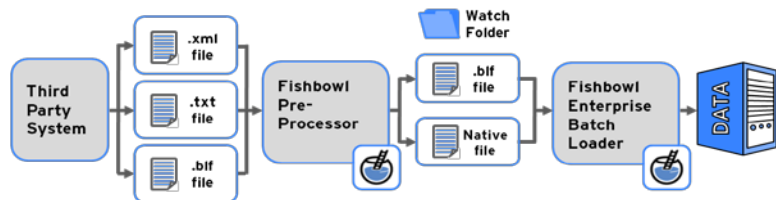

- Easily load content from other systems into WebCenter Content
- Batchload content into a workflow
- Integrate enterprise business systems like EBS, JDE & PeopleSoft with Oracle WebCenter Content by consolidating the content from within those systems

Use Cases:

- **ERP Integrations:**
JD Edwards & PeopleSoft Sales report distribution or Profit/Loss statements
- **CAD Integrations:**
Turn CAD Drawings into PDFs
- **Large volume content migrations:**
Move content from file shares or Third-party ECM systems to WebCenter
- **Document imaging:**
Hard copy conversion (TIFF to PDF) for documents requiring wet signatures

Product Overview:

- Robust content migration component that integrates business systems with WebCenter Content
- Configurable pre-processor
- Watch directory
- Metadata mapping
- Scheduling
- Emails administrator upon error
- WebCenter Content Support for 7x to 11g
